13th April 2024

14th April 2024

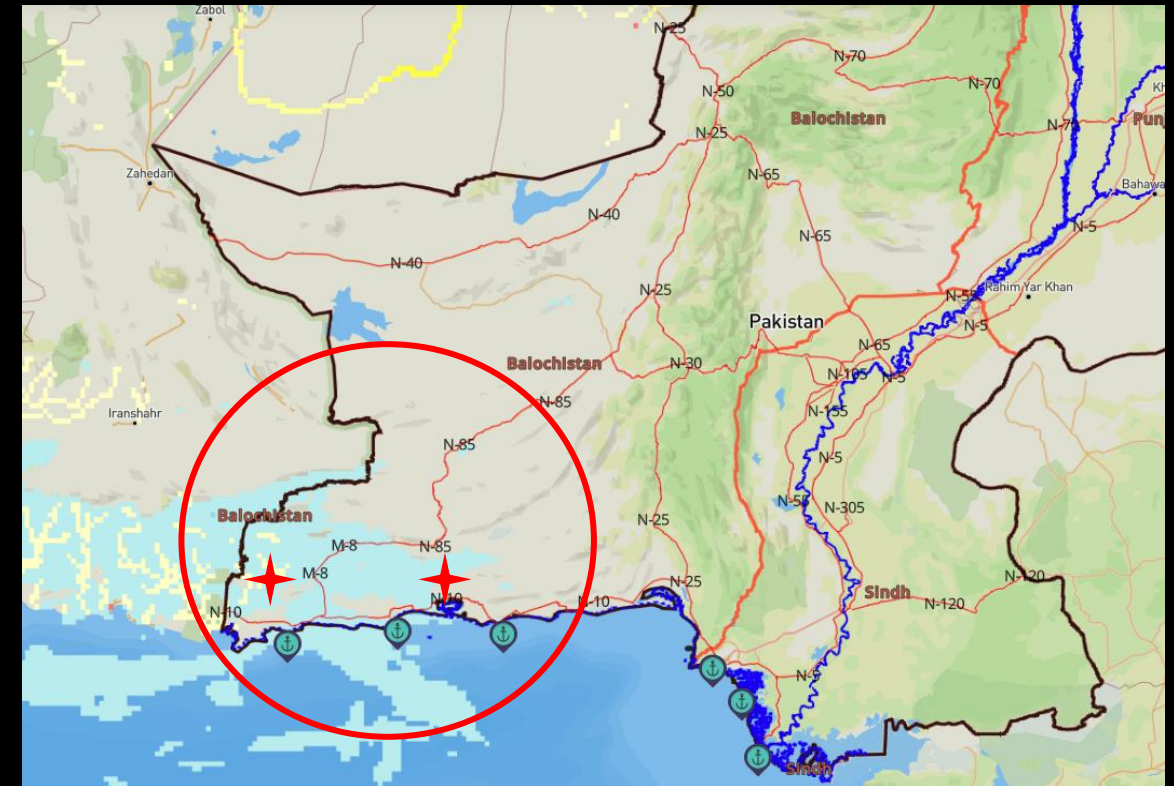

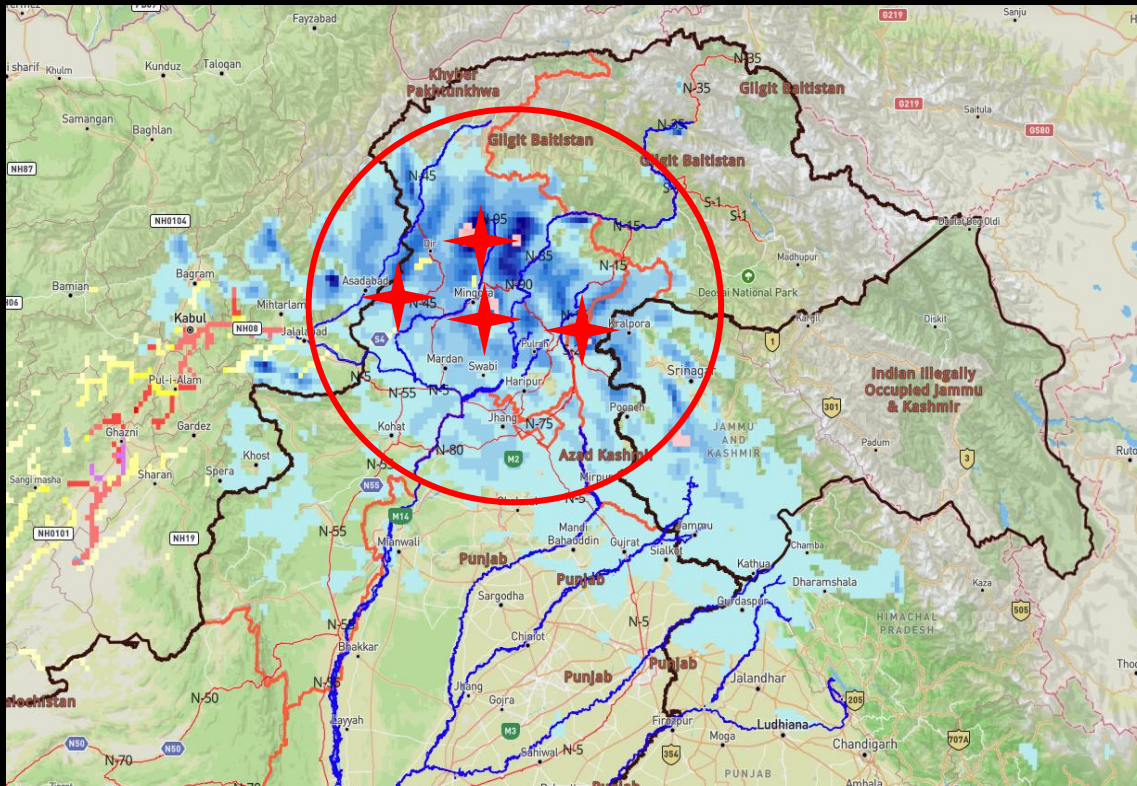

15th April 2024

National Disaster Management Authority (NDMA) - Pakistan

According to weather forecasts, significant rainfall is anticipated in Upper Khyber Pakhtunkhwa (KP) and Southern Balochistan. These heavy rains are likely to cause a surge in water levels within streams and nullahs (ephemeral streams). This rapid rise in water volume can lead to flash flooding, posing a potential threat to life and property in the affected areas.

KP, GB, Galiyat, Murree and State of AJ&K

- (1) **Rainfall / Thunderstorms** may **disrupt roads** during the forecasted period.
- (2) **Tourists** are advised to **remain cautious** during the spell and check weather updates before traveling.
- (3) **Electricity / other utility services** may **get disrupted**.
- (4) **Heavy Rainfall** may generate **flash flooding** in local nullahs / streams and river tributaries.

Punjab / Sindh / Islamabad Capital Territory

- (1) **Hill torrents** are expected in DG Khan and Rajanpur.
- (2) **Heavy Rainfall** may generate **flash flooding** in local nullahs / streams and river tributaries.
- (3) **Windstorms / Hailstorms** may damage crops, loose structures, etc.
- (4) **Electricity / other utility services** may **get disrupted**.
- (5) **Farmers** are advised to remain **extra cautious** and plan agricultural activity accordingly during the spell.
- (6) **Tourists** are advised to **remain cautious** during the spell and check weather updates before traveling.
- (7) **Temperatures** are likely to **drop** during the spell.
